1 Chairman's Statement

Chairman's Statement

Dear Shareholders,

On behalf of my fellow Directors, I am pleased to present Sure Ventures plc's interim results for the six months ended 30 September 2025.

Financial Performance

During the period, the Company reported a net asset value (NAV) per share of £1.70 (10p), representing a modest 3% decrease over the six months. This outcome is in line with expectations, reflecting normal short-term market fluctuations while the Funds continue to deploy capital into high-quality portfolio companies.

The Company benefited from a significant liquidity event during the period following the exit of Blockchain Limited (t/a Getvisibility) from Fund I to US-based Forcepoint. The transaction achieved a high cash multiple and resulted in a €1.77m distribution to the Company in April 2025. This event strengthened the Company's liquidity position, allowing it to meet obligations and maintain a focus on further investment.

Since its inception in 2017, the Company has created a balanced portfolio of early-stage companies in the rapidly evolving sectors of AI, AR/VR, IoT, and Cybersecurity. Fund I is now in its realisation phase, with notable exits such as Getvisibility and prior successful exits reinforcing the investment strategy. Fund II continues to progress in line with expectations, building a portfolio of early-stage UK and Irish software companies.

Investment Environment

Technology markets have continued to defy conventional valuation logic. Despite recurring concerns about overpricing, the sector has shown remarkable resilience. Equity markets remain near record levels, and venture valuations—especially in artificial intelligence, cybersecurity, and data infrastructure—have even expanded through 2025.

Several factors explain this apparent paradox. First, technology remains the primary driver of productivity growth, and capital is still seeking exposure to that long-term structural growth. Second, corporate balance sheets remain unusually strong, fuelling continued M&A activity and demand. Third, public investment in AI infrastructure and cybersecurity—from both sovereign wealth funds—has provided a durable floor under valuations by signalling support rather than speculative exuberance.

Venture investors have become more selective rather than more cautious. Global deal volume has fallen sharply from the record levels of 2021, with the number of completed transactions down 35-40% across the US and Europe. However, the total capital deployed has remained relatively stable, as investors concentrate on fewer, larger rounds at sustained or higher valuations. Capital is flowing to companies with demonstrable commercial traction, strong unit economics, and proprietary technology. The result is a market where quality assets command premium multiples, while weaker propositions struggle to raise funding or face valuation pressure.

In this environment, the Company's exposure to artificial intelligence, cybersecurity, and other high-growth technology continues to look well positioned. These are among the few segments where valuations are increasingly justified by tangible adoption and consistent revenue growth, rather than pure narrative.

Portfolio Update - Fund I

The Company committed €7 million to the Sure Valley Ventures Sub-Fund of Suir Valley (the "Fund I"), of which €6.9 million has been drawn as at 30 September 2025.

The two most significant developments remain the Landvault and Getvisibility exits, which are consistent with the Company's early-stage investment strategy. The Landvault position was sold in July 2024 in an all-share transaction. Since that time, Infinite Reality has expanded rapidly through multiple acquisitions and multiple funding rounds, reaching a reported valuation more than 10x its March 2025 year-end. While a liquidity opportunity has not yet materialised, this represents a potentially transformative event for Fund I. The AIFM continues to explore avenues to exit as part of the due course.

In March 2025, the sale of Getvisibility to Forcepoint was announced, closing shortly thereafter. This transaction generated approximately €1.77 million for the Company and delivered a strong exit, reinforcing confidence in the Fund I model and exit potential.

Camaramatics, Fund I's leading telematics and fleet management company, has continued to perform strongly during the period. The business has expanded across Europe and North America, generating recurring SaaS revenues and strategic partnerships with vehicle manufacturers. It remains one of the most advanced candidates for a liquidity event within the remaining portfolio.

No portfolio companies were written off during the period, and the AIFM continues to identify investment opportunities across the remaining Fund I investments. Following the repayment of the revolving credit facility in April 2025, Fund I is now positioned as a maturing portfolio with multiple exit prospects and a clear path toward further distributions.

Portfolio Update - Fund II

Fund II, the Sure Valley Ventures Enterprise Capital Fund, is in its investment phase, with a total commitment of £5m and £1,352,670 drawn down as at 30 September 2025. The Fund has made several investments to date. Recently, this includes:

- Literal Labs - Newcastle-based software company (June 2025)
- Elelem AI - Derbyshire-based AI developer (June 2025)
- Complimind AI - London-based AI company (July 2025)

The Fund continues to evaluate additional opportunities, with a healthy deal pipeline and expects to make further investments during the coming months. Fund II's portfolio strategy remains focused on investing in companies with high growth potential in AI, AR/VR, IoT, and cybersecurity.

Commitments and Funding

The Company has approximately €100k remaining on its Fund I commitment and continues to have commitments to Fund II. These obligations are expected to be funded from existing cash resources, investments, anticipated new subscriptions, and access to available facilities.

Dividend

No dividend was declared for the six months ended 30 September 2025 (30 September 2024). The Company's strategy remains focused on capital growth rather than income. Special dividends may be considered in the future as liquidity events allow.

Gearing

The Company may utilise gearing of up to 20% of NAV to enhance liquidity and manage working capital. As of 30 September 2025, no borrowings were outstanding following repayment of the revolving credit facility in April 2025. The Board and Investment Manager continue to monitor market conditions closely.

Capital Raising

During the period, no new share issuance occurred. The total shares in issue remain 75,000,000. Recent placements, including those in June and August 2024, and January 2025, were completed at a mid-market price, reflecting continued investor confidence.

Outlook

The Company remains well positioned to capitalise on its investment strategy. Fund I is now maturing, with exits being pursued to realise additional gains. Fund II continues to deploy

diversified set of early-stage technology companies, with the potential for substantial value coming years.

Despite broader market volatility and geopolitical uncertainty, the underlying strength of cybersecurity markets provides confidence in the Company's long-term strategy. The Board and Management remain committed to delivering sustainable growth and exploring opportunities for shareholders when market conditions allow.

**Perry Wilson,
Chairman**

9 December 2025

2 Investment Manager's Report

The company

Sure Ventures PLC (the "Company") was established to enable investors to gain access to technology companies in the four exciting and expansive market verticals of artificial intelligence, augmented reality and virtual reality (AR/VR), Cybersecurity and the Internet of Things (IoT).

The Company gains access to deal flow ordinarily reserved for venture capital funds through angel investors, establishing a diversified software-centric portfolio with a clear exit route. A fund on the London Stock Exchange offers investors:

- Relative liquidity
- A quoted share price
- A high level of corporate governance

It is often too expensive, too risky and too labour-intensive for investors to build a portfolio themselves. We are leveraging the diverse skillsets of an experienced management team and an industry network to gain access to quality deal flow, the expertise to complete extensive due diligence, target markets and the entrepreneurial skills to help these companies to mature. By investing in the Company, you will get exposure to Sure Valley Ventures which in turn makes investments in the above sectors in the UK & Ireland.

AI, AR/VR, IoT, and Cybersecurity Market Update 2025

Sure Ventures PLC faces a unique investment opportunity across four converging sectors valued at over \$1.7 trillion globally. While market conditions have created selective investment opportunities, the artificial intelligence revolution is driving exceptional growth with AI companies capturing significant capital funding in 2024. The regulatory landscape is reshaping cybersecurity investment, IoT adoption is accelerating IoT deployment, and immersive technology markets are pivoting towards enterprise applications after consumer disappointments.

Artificial Intelligence (AI)

AI continues to dominate global technology investment. As of September 2025, the global market is on track to reach \$308-\$320 billion in 2025, up from \$233 billion in 2024. The long-term forecast of \$1 trillion by 2032 remains intact, supported by sustained enterprise adoption. Total VC funding reached \$86 billion YTD (Jan-Sep 2025), slightly below 2024's record levels but still representing robust global VC deployment.

Key 2025 Developments:

- Agentic AI deployment has accelerated, with over 40% of large enterprises implementing stage autonomous agent workflows.
- AI infrastructure spending has surged, driven by demand for compute-efficient models and on-premise LLM deployments.
- Regulatory momentum: Several countries, including the UK, have introduced 2025 frameworks requiring greater transparency and model risk reporting.

Enterprise adoption has reached new highs, with 71% of organisations now using AI weekly, and over 50% reporting measurable ROI from automation and knowledge-work automation.

Cybersecurity

Cybersecurity remains resilient and regulation-driven, with global spending forecast at \$218-220bn by 2025, remaining steady at \$7.4bn YTD, ahead of 2024's pace. Zero Trust architectures are now mainstream, with 75% of new remote-access deployments. AI-enhanced cybersecurity tools deliver 98-99% threat detection, significantly reducing incident-response times.

The sector benefits from compliance cycles tied to the EU AI Act and the UK's forthcoming Resilience Bill.

Immersive Technology

AR/VR continues its shift from consumer entertainment to enterprise applications. Market size in long-term growth forecast to exceed \$200bn by 2030.

Funding remains muted but stabilising, reaching \$92m YTD. Enterprise training shows exceptional growth, with Fortune 500 companies deploying VR-based training solutions.

Training and simulation platforms in manufacturing, aviation, and healthcare remain the fastest growing, contributing to a training market projected to reach \$250+ billion by 2032.

Engagement rates and retention improvements consistently exceed those of traditional learning systems, creating a significant commercial opportunity.

Internet of Things

IoT adoption continues to expand with strong industrial uptake. The global IoT market is expected to reach \$1.2 trillion by 2025. Connected devices surpassed 20bn in mid-2025, on track for 40bn by 2030.

Industrial IoT leads adoption, driven by measurable gains in operational efficiency. 5G edge computing is expected to reach 100% by 2025, reinforcing demand for real-time analytics and AI-enabled sensor networks.

Manufacturers report 20-35% productivity improvements from predictive-maintenance and edge-AI solutions.

Conclusion

The convergence of AI, AR/VR, IoT, and cybersecurity represents a \$1.7+ trillion investment opportunity driven by enterprise adoption, regulatory compliance, and technology integration trends. Successful platform companies mastering multi-sector integration while leveraging geographic advantages will define the next technology corridor.

The window for foundational investments is narrowing as market leaders consolidate capabilities through acquisitions, making cross-sector platform strategies essential for capturing exponential value creation in the technology landscape.

The benefit of investing in companies in these four key sectors at a Seed stage are that:

Sure Valley Ventures can invest in these companies at attractive valuations of between £2 to £10m, with a target exit of the company for initial investment amounts of between £0.75m to £1.5m.

- The investment sectors (AI, AR/VR, IoT, and Cybersecurity) have massive growth potential and creates a tailwind behind the companies that are creating these new markets.
- These sectors are also ones that have the potential of creating the next big European Company, leveraging Europe's existing technology strengths.

- These companies have the potential to get to exponential growth and of achieving an IPO or I of the Silicon Valley giants who are all investing in these sectors.
- The Sure Valley Ventures Platform and Network can help fast-track the development of the the chasm to the Series A investment round, which in turn increases the potential for an ou reduces the risk of the failure of a portfolio company.

In summary, Sure Ventures PLC continues to gain exposure to all these benefit through its pa Valley Ventures Funds, at what is a very exciting time to be investing in this space.

PORTFOLIO BREAKDOWN

On 6 February 2018 the Company entered into a €4.5m commitment to Sure Valley Ventures ("F fund of Suir Valley Funds ICAV and its investment was equalised into Fund I at that date. On 31 . €2.5m was committed to Fund I, taking the total investment in Sure Valley Ventures to €7m. Th made on 5 March 2018 and as at 30 September 2025, a total of €6,886,894 (98.4%) had been dr commitment.

On 25 February 2022, Sure Ventures PLC committed to invest £5m into the second fund of Sure V II"). Fund II completed the £85m close of UK software technology fund, which aims to increas capital to high-potential, early-stage UK companies. The first drawdown was made on 23 Februa September, a total of £1,352,670 (27.04%) had been drawn down against this commitment.

As detailed in the Statement of Position included in the following financial statements, these two Fund investments alongside a residual listed holding represent the entire portfolio of Sure Ve September 2025.

During the period to 30 September 2025, there was no additional issuance of equity. The total sha 30 September 2025 remains 7,948,130.

SURE VALLEY FUNDS ICAV

Suir Valley Funds ICAV (the "ICAV") is a close-ended Irish collective asset-manag segregated liability between sub-funds incorporated in Ireland pursuant to the Irisl management Vehicles Act 2015 and constituted as an umbrella fund insofar as the share is divided into different series with each series representing a portfolio of assets compris fund.

The ICAV was registered on 18 October 2016 and authorised by the Central Bank of Ire investor alternative investment fund ("QIAIF") on 10 January 2017. The initial sub-fund Valley Ventures, or Fund I, which had an initial closing date of 1 March 2017. Fund I range of software companies with a focus on companies in the AR/VR, AI and IoT sector

As at 30 September 2025 Fund I had commitments totaling €27m and had mad investments into companies spanning the AR/VR, AI and IoT sectors. One of these inve 2019, giving Fund I its first realised gain on exit of around 5X return on investment.

In March 2018, Immersive VR Education Limited, Fund I's first investment, complete London Stock Exchange (AIM) and the Dublin Stock Exchange (ESM). In July

improvement in share price, Fund I decided to sell sufficient shares to recover its initial investment, which resulted in a realised gain of €73k being payable to Sure Ventures PLC, along with its investment, and some Escrow funds from the aforementioned exit. The final Escrow payment was settled in July 2021, seeing another €151k flowing to the PLC. The Fund also exited Smarttech 247 PLC for a 1.07X return on capital in April 2024, this was retained by subsequent capital call requirements.

In March 2025, SVV Fund I agreed the sale of Visibility Blockchain Limited (t/a Getvisib) a US-based global leader in data and cloud security. The Fund received €10.55m from the sale, which represented a 4.4X cash multiple. In April 2025, the cash was received by the Fund and €1.77m was made to Sure Ventures Plc.

Total distributions from Fund I to the PLC as at 30 September 2025 were €3,529,588, representing 51.25% of the paid in capital.

SURE VALLEY VENTURES ENTERPRISE CAPITAL FUND

Sure Valley Ventures Enterprise Capital Fund is a closed-ended UK based GP/LP Fund which first closed on 1st March 2022. The British Business Bank are the cornerstone investors, committing £50m of the initial £85m, with Sure Ventures PLC committing a total of £5m.

Fund II has a similar investment strategy to the first Fund, being a seed capital investment in software companies that are focused on bringing a disruptive innovation to market. It plans to invest in software companies from across the UK through its new fund. As well as being based in London and Cambridge, the Sure Valley team has recently opened an office in Manchester to harness the significant and exciting innovation clusters that have developed around creative technology in the North of England and in AI opportunities in cities such as Manchester, Leeds, Sheffield and

SURE VALLEY VENTURES ENTERPRISE CAPITAL FUND (continued)

As at 30 September 2025 the Fund had drawn down a total of £22.05m and had made 10 investments. In the six month period to 30 September 2025, the Fund has invested £500k into a London based company called Literal Labs in June 25; £300k into a Derbyshire based company called Lateral in June 25; and finally, £500k into London based Complimind AI in July 25. The total amount distributed to Sure Ventures PLC was £1,352,670.

PERFORMANCE

In the year to 30 September 2025 the Company returned a net asset value of £1.70/unit, a decrease from the audited March-25 NAV of £1.76.

The investment in Sure Valley Venture Enterprise Capital Fund has returned a NAV of £0.71 (NAV of £0.71). This performance is considered in line with expectation as the Fund continues to build its portfolio and would be unlikely to see any immediate gains given the infancy of the Fund.

Given the lack of revenue to support the ongoing operational costs of the PLC, the subsequent distribution from SVV Fund I has provided a welcome increase in liquidity

unrealised gains in the two Sure Valley Funds are key to maintaining a steady NAV, until there are more exits and returns of capital, which we hope to see in the near future.

FUTURE INVESTMENT OUTLOOK

Fund I has achieved two very positive realised gains, recovered its full investment in companies, as well as seeing a number of unrealised gains across the portfolio. The investment is continuing to mature, with most companies having now completed series which provided the previous NAV growth that was set out to achieve from inception. There will be on finding exit opportunities as we look to realise some further gains across the investment period of this Fund has now closed, there are no more new investments to be

In addition to this, having more exposure to the UK market for early-stage high growth companies through the commitment into the Sure Valley Ventures Enterprise Capital Fund provides further opportunities as the Fund continues to deploy capital across the landscape with a view to significant returns for investors throughout its lifecycle. The last six months have been particularly successful for this Fund, with three additional companies added to the portfolio, and several more in the pipeline for evaluation.

We remain confident in the future outlook of the Company for the remainder of the financial year with the recent significant liquidity event coupled with the exciting pipeline of deals that are being completed through the Enterprise Capital Fund and the increasing maturity of the first Sure Valley Ventures Fund. Whilst the Funds provide great exposure to a wealth of expertise and a larger suite of investment opportunities, we also reserve the right to make further direct investments provided there is sufficient value to be realised.

3 Interim Management Report

Interim Management Report

The report below together with the Chairman's Statement, Investment Manager's Report disclosures in the notes to the financial statements constitute the Interim Management Report of the Company (the "Company") for the six months ended 30 September 2025.

Principal risks and uncertainties

The principal risks and uncertainties associated with the Company's business are divided into the following main areas:

- Operational risks, including risks associated with reliance on third party service providers and on key individuals at the Investment Manager and fluctuations in the market price of the Company's shares;
- Investment risks, including risks associated with the investment objective, borrowing and investments; and
- Regulatory risks, including risks associated with maintenance of investment trust status and compliance with applicable legislative obligations.

The above risks are described further in the Company's Annual Report for the year ended 31 March 2025 together with measures that have been put in place to mitigate and manage those risks.

In the view of the Directors, the principal risks and uncertainties reported in the latest Annual Report for the year ended 31 March 2025 remain unchanged and will be applicable to the remaining financial year.

GOING CONCERN

The Board of Directors and the Investment Manager believe that the operational viability and financial status of the Company remains intact and will continue for the next financial year and the foreseeable future. The Board of Directors has no concerns in regard to the ongoing operations of the Company.

The Board of Directors is also satisfied that the key service providers have the ability to continue to provide their services efficiently in a remote or virtual working environment.

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Directors confirm that, to the best of their knowledge that:

- a) the condensed set of unaudited financial statements contained within the half-yearly financial statements have been prepared in accordance with International Accounting Standard ("IAS") 34, "Financial Reporting of Interim Financial Statements" as required by Disclosure and Transparency Rule 4.2.4R, and give a fair view of the assets, liabilities, and financial position of the Company;
- b) the Interim Management Report includes a fair review, as required by Disclosure and Transparency Rule 4.2.7R, of important events that have occurred during the first six months of the financial year, their impact on the condensed set of unaudited financial statements, and a description of the principal risks and perceived uncertainties for the remaining six months of the financial year.

- c) the Interim Management Report includes a fair review of the information concerning transactions as required by Disclosure and Transparency Rule 4.2.8R.

For and on behalf of the board of directors

4 Alternative Performance Measures ("APMs")

Alternative Performance Measures ("APMs")

APMs are often used to describe the performance of investment companies although specifically defined under UK-adopted international accounting standards. Calculations for the Company are shown below.

ONGOING CHARGES

A measure expressed as a percentage of average Net Asset Value ("NAV"), of the regular costs of running an investment company, calculated using a methodology consistent with the Association of Investment Companies ("AIC").

For the six months ended 30 September 2025		
Average NAV (£'000)	a	
Recurring costs (£'000)	b	
	b/a	

PREMIUM/DISCOUNT

The amount, expressed as a percentage, by which the share price is less than the NAV per share.

As at 30 September 2025		
NAV per ordinary share	a	
Share price	b	
	(b-a)/a	

TOTAL RETURN

A measure of performance that includes both income and capital returns. This takes into account gains and reinvestment of any dividends paid out by the Company, with reinvestment on the date of payment.

For the six months ended 30 September 2025		NAV	
Opening as at 31 March 2025 (p)	a	175.79	
Closing as at 30 September 2025 (p)	b	170.03	
Dividend reinvestment factor	C	1	
Adjusted closing (d = b x c)	D	170.03	
Total return	(d-a) / a	(3.28%)	

5 Financial Statements

Notes to the Condensed Interim Financial Statements

1) GENERAL INFORMATION

Sure Ventures plc (the "Company") is a company incorporated in England and Wales (10829500) on 21 June 2017 and commencing trading on 19 January 2018 upon listing. The registered office of the Company is International House, 36-38 Cornhill, London, EC3V 3NG, United Kingdom.

The Company is an investment company within the meaning of section 833 of the Companies Act 2006.

The Company operates as an investment trust in accordance with Chapter 4 of Part 24 of the Companies Act 2006 and the Investment Trust (Approved Company) (Tax) Regulations 2011. In order to qualify as an investment trust, the Company has conducted its affairs so that it is able to maintain its status as an investment trust. Approval of the Company's application for approval as an investment trust was granted by Her Majesty's Revenue and Customs ("HMRC") on 22 November 2018, applicable from the date of the Company's incorporation commencing 1 April 2018.

The Company is an externally managed closed-ended investment company with an unlisted share capital and no employees.

The information set out in these unaudited condensed interim financial statements for the year ended 31 March 2025 does not constitute statutory accounts as defined in section 435 of the Companies Act 2006. The Statement of Financial Position comparative figures and the comparative figures for the year ended 31 March 2024 in the condensed interim financial statements as at 31 March 2025 are derived from the audited financial statements for that year. The financial statements for the year ended 31 March 2025 have been audited by the Registrar of Companies and contain an unqualified audit report and did not contain any emphasis of matter or statements under section 498(2) or (3) of the Companies Act 2006. The financial statements of the Company for the year ended 31 March 2025 are available upon request to the Company's registered office.

2) BASIS OF ACCOUNTING

The financial statements of the Company have been prepared in accordance with UK-adopted international accounting standards in accordance with the requirements of the Companies Act 2006. The condensed interim financial statements contain all the information required for the full annual financial statements and should be read in conjunction with the annual financial statements of the Company for the year ended 31 March 2025. The accounting policies adopted in the preparation of the financial information in these unaudited condensed interim financial statements are unchanged from those used in the Company's financial statements for the year ended 31 March 2025. This report does not itself contain sufficient information to constitute a full annual financial statement.

3) ESTIMATES

The preparation of the unaudited condensed interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income, and expenses. Actual results may differ from those estimates.

In preparing these unaudited condensed interim financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty are the same as those that applied to the Company financial statements as at and for the year ended 31 March 2025.

4) FINANCIAL RISK MANAGEMENT

The Company's financial risk management objectives and policies are consistent with those disclosed in the Company's financial statements as at and for the year ended 31 March 2025.

5) TAXATION

As an investment trust the Company is exempt from corporation tax on capital gains. Dividend revenue income is subject to tax, but offset by any interest distribution paid, which has the effect of reducing that corporation tax to nil. This means the interest distribution may be taxable in the hands of the Company's shareholders.

6) EARNINGS PER SHARE

For the six months period ended 30 September 2025	Revenue (pence)	Capital (pence)
Earnings per ordinary share	(3.42)p	(2.33)p

The calculation of the above is based on revenue returns of (£271,945), capital returns total returns of (£457,476) and weighted average number of ordinary shares of 7 September 2025.

For the financial year ended 31 March 2025	Revenue (pence)	Capital (pence)
Earnings per ordinary share	(5.36)p	103.87p

The calculation of the above is based on revenue returns of (£403,808), capital returns total returns of £7,427,812 and weighted average number of ordinary shares of 7,540,1 2025.

7) INVESTMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS

	As at 30 September 2025 £
Opening cost	
Opening fair value	14,741,288

10) SIGNIFICANT EVENTS

On 14 July 2025, the company has made direct investment into MySafeDrive Ltd (a provider of camera-based parking solutions) amounting to €200,000.

11) SUBSEQUENT EVENTS

The Company had anticipated a major liquidity event to occur during 2025 through a tender offer for Reality shares, however based on recent reports this event is no longer expected. The Company is working closely with Sure Valley Ventures to monitor this development, an update on the valuation of the Infinite Reality position, and it will issue a further update when it is in a position to do so.

There were no other subsequent events which would require disclosure in the financial statements.
